450 wet SERIES MICROGRINDER

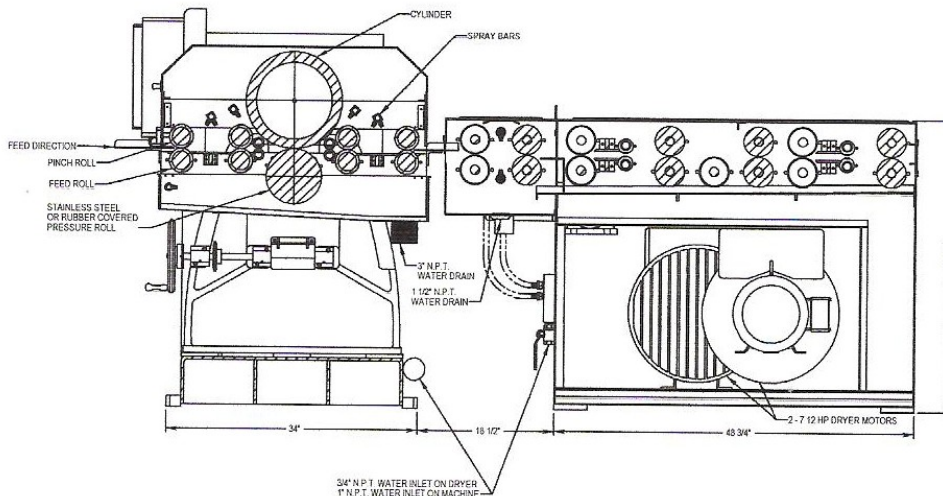

The heart of the machine is a dynamically balanced cylinder to which industrial coated abrasive is applied. The cylinder is drilled for water circulation to help diffuse friction heat, preventing distortion of the .0005" concentricity.

When making adjustments finer than can be made with the machine's dial indicator, the graduated collar is used. One complete turn of the hand wheel moves the pressure roll .005".

RIGHT SIDE VIEW

AVAILABLE IN STANDARD WIDTHS OF 24", 40" AND 52"

Larger widths also available upon request

Demonstration equipment available at our Gloversville Plant.
Send or bring us your samples or finishing problems.
